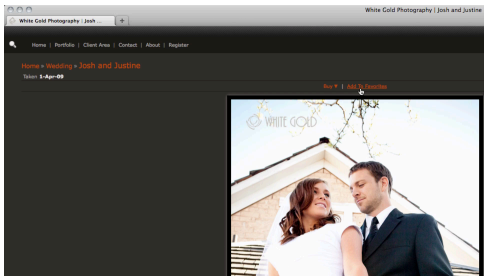
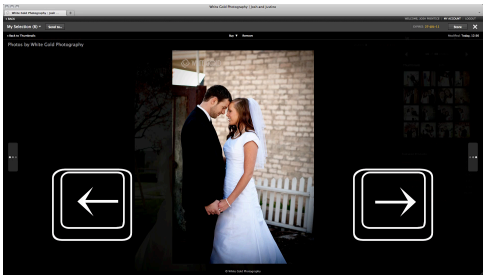
Add to Favorites



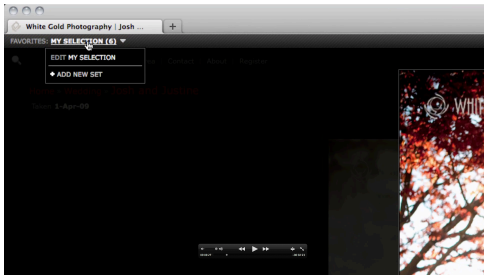
Select your favorite photos by clicking 'add to favorites' to create a Favorites Set. Use your arrow keys to navigate between photos in the gallery, and use the keyboard shortcut 'F' to add other photos to your Favorites Set. This can also be done in dim the lights mode.

To view and edit your Favorites Set, click the favorites title in the top-left corner. Double-click a thumbnail to view an individual photo, and use the arrows keys to navigate between photos. Click the photo again to view the entire set. You can also remove photos, rearrange their order, and change the thumbnail size.



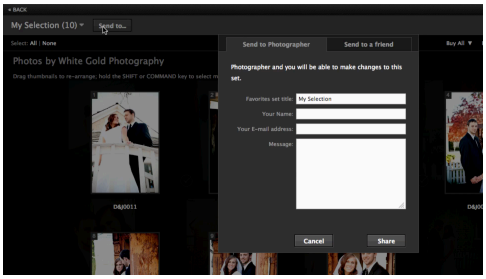
To continue adding more photos, click the 'Back' button in the top-left corner. From the galleries thumbnail view, you can also 'Select' the photos you like best, then use 'Add to Favorites' to add them to your Favorites Set.

Click on the favorites title once again to view and edit. Your Favorites Sets expire after a month. If you are logged into your account, you can click the 'Store' button to store your Favorites Set. Stored favorites never expire, and you can view and edit them when logged in from any computer.



To share your Favorites Set, click 'Send To'. Send the set to us with a new title, your contact information, and any instructions you want to add. If you make changes to the set after sharing, please let us know. We also can make changes to your Favorites Set.

'Send To' can also be used for sharing a Favorites Set with friends and family. Share a read-only set, or give the full access link to allow others to add, remove, and reorder photos.



To create another Favorites Set, go back to your gallery, scroll over your current favorites title, and click 'Add New Set'. Name this set, and click 'create'. Now you can add photos to this new set.

When you are ready to purchase a Favorites Set, switch to the set you wish to purchase, click on the favorites title, then choose 'Buy All'. You can also select an individual photo and choose to 'Buy' only that photo.
